

ENVIRONMENTAL POLICY

As a leader in the leisure, entertainment, gaming and tourism industry, Sun International is committed to providing memorable experiences for its guests in a sustainable and environmentally responsible manner. We recognise and acknowledge that the development, operation and management of our properties have financial, social and environmental implications for our stakeholders. Sun International understands that the long-term future of the group is dependent on the sustainable use of our natural resources and as a result, our environmental strategy forms an integral part of our business strategy.

Sun International is committed to minimising, and where possible preventing, its impact on the environment through:

- developing, implementing and maintaining a Safety, Health and Environmental (SHE) management system that is in line with the ISO 14001 and ISO 45001 standards;
- continually improving the environmental management system in order to enhance our environmental performance;
- ensuring compliance with applicable environmental legislation, regulations and other relevant compliance obligations and promote and monitor environmental standards within the group;
- promoting efficient use of materials and resources throughout our facilities by:
 - ensuring responsible use of energy through energy conservation initiatives, increasing energy efficiencies and investing in renewable energy where practically possible;
 - developing and improving operations and on-site technologies to minimise waste generation with the aim to achieve a zero-waste-to-landfill; and
 - implementing water saving initiatives and increasing the reuse and recycling of waste water to minimise the use and dependence on clean potable water.
- setting and regularly reviewing environmental objectives and targets which are incorporated into our strategic goals to ensure continual environmental improvement;
- promoting awareness of shared responsibility and accountability amongst employees, stakeholders, local communities and other affected parties on environmental matters of mutual concern;
- promote and encourage the adoption of our environmental principals by suppliers and contractors acting on behalf of the group; and
- engaging and informing stakeholders of our environmental commitments through our ongoing monitoring and reporting initiatives.

Sun International remains committed to protecting the environment, minimising our environmental footprint and continually reviewing and improving our sustainability strategy.
