

SUSTAINABLE SEAFOOD POLICY

Sun International is an internationally recognised and respected gaming and hospitality group that strives to provide memorable experiences for our guests. Part of this experience includes providing our guest with sustainable seafood. As a member of WWF South Africa's Southern African Sustainable Seafood Initiatives (SASSI), Sun International continues to implement and improve on our sustainable seafood strategy across our food and beverage outlets and restaurants.

As a group we understand that there is a global concern around the over-exploitation of seafood resources and the environmental impacts of fishing and aquaculture activities on marine ecosystems. We are therefore committed to driving positive change in the manner we source and serve seafood in our restaurants by:

- supporting sustainable seafood choices and obtaining our seafood from legally and responsibly managed seafood suppliers;
- working together with our seafood suppliers to ensure that our procured seafood is traceable back to its origins;
- providing our food and beverage operations with the necessary training to recognise and purchase sustainable seafood; and
- providing our guests with sufficient and accurate information on seafood products, allowing them to make environmentally responsible choices.

To ensure that Sun International adheres to this policy, we have developed clear targets to ensure that by the end of 2020 we source seafood products from suppliers that are:

- certified by the Marine Stewardship Council (MSC); or
- certified by the Aquaculture Stewardship Council (ASC); or
- listed as Green on WWF-SA's SASSI consumer list; and/or
- sourced from fisheries or farms that are actively engaged in credible, time-bound improvement projects to achieve either MSC or ASC certification or WWF-SASSI Green-list status.

Sun International is committed to contribute to a balanced and sustainable environment and continues to work towards a more sustainable supply of seafood for the group.
